

OPERATING PROCEDURES FOR INSTALLING CONSTRUCTION METERS ON FIRE HYDRANTS

- 1. You must have the proper fire hydrant wrench to operate the hydrant.**
 - 2. Secure the caps that are not being used.**
 - 3. Make sure the meter flange has a gasket to eliminate any leaks.**
 - 4. Turn hydrant fully on.**
 - 5. If there are any leaks at the base or caps of the hydrant, please call 972-524-4843.**
 - 6. Upon completion of the work day, turn hydrant off slowly until snug. Do not over tighten the operating nut.**
-
